Skills

API Management: Google Apigee (Edge, X, Hybrid, OPDK), Layer 7 CA API Gateway, API Design (OpenAPI).

Security & Protocols:

OAuth, JWT, SSL/MTLS, IAM, KVM, Target Servers.

Cloud & DevOps: Google Cloud Platform (GCP), Git, Jenkins, Docker, Splunk, Dynatrace.

Development: Python (Django, Flask), Node.js (Express), Java, JavaScript, React JS, Angular, PostgreSQL.

Tools: Postman, SoapUI, VS Code, Beyond Compare, JIRA.

Manish Kirnapure

Apigee Developer | Python Developer

Experienced **Apigee Developer** with 5.8+ years of expertise in API design, development, and management using **Google Apigee Edge, X, and OPDK**. Proficient in policy configuration, shared flow creation, and **GCP integration** (Pub/Sub, Cloud Functions) using Python and Node.js. Proven track record in automating large-scale API migrations and optimizing security through Java callouts and MTLS.

Work Experience

System Analyst, Bitwise Solution, Pune

June 2025 - Present

- Spearheading the migration of API proxies and shared flows from **Apigee Edge to Apigee Hybrid**.
- Developed a custom **Python-based migration utility Using Python** to automate the conversion of Edge proxies into **Apigee X/Hybrid format**.
- Engineered the utility to generate comprehensive **policy summaries**, enabling the creation of detailed configuration inventories and dependency maps.
- Automated the retrieval of environment-specific configurations, including **Apps, Products, Developers, KVMs, Target Servers, and TLS settings**.
- Utilized **Beyond Compare, Git, and Jenkins** to ensure version control and configuration accuracy during complex migration cycles

Project Associate. Cognizant, Pune

January 2024 - May 2025

- Designed, developed, and optimized APIs using **Google Apigee Edge and Apigee X**.
- Led the **migration of proxies from OPDK to Hybrid** for clients in the Healthcare sector.
- Implemented reusable **shared flows** for standardized authentication, logging, and error handling.
- Utilized **Splunk and Dynatrace** to analyze logs, perform advanced queries, and generate insightful reports.
- Streamlined deployment methodologies using **Git and Jenkins** for continuous integration.
- Developed **Python-based automation scripts** to programmatically update proxy code, enhancing operational efficiency and deployment speed.

- Managed full-lifecycle API development, installation, and testing for CA API Gateway and Google Apigee.
- Implemented API security measures including OAuth, JWT, and API Key authentication.
- Created Java Callouts for encryption, decryption, and micro services to enhance API security and performance.
- Utilized Apigee extensions to publish messages to Google Cloud Pub/Sub.

Projects

Totalytics (Main Developer)

- Objective: Developed a new-age CRM tool designed for sales-oriented organizations to measure sales efforts against business returns.
- Benefits: Provided trustworthy reporting, dynamic dashboards, automated messaging, and streamlined collaboration for enhanced efficiency.
- Tools and Technology: Node JS, Angular, VS Code, PostgreSQL, Sequelize, Postman.

Perfios (Banking Sector)

- Objective: Integrated the Perfios API with Apigee to automate bank statement analysis and document processing.
- Tools and Technology: Layer 7, Apigee, Java, NGINX, GCP, JIRA, Postman.

LOP - List Of Product (Banking Sector)

- Objective: Maintained user loan offers based on CIBIL and loan history.
- Tools and Technology: Layer 7, Apigee, Java, NGINX, GCP, JIRA, Postman.)

Honors & Awards

Delivery Excellence Award (Bitwise Solution, Jan 2026): Recognized for technical leadership in the migration and modernization of a large-scale API landscape from Apigee Edge to Apigee X using an automation-first approach.

Education

BE in Computer Science and Technology(CSE), Priyadarshini J.L. College Of Engineering, Nagpur (7.15 CGPA)
